

MATERIAL SAFETY DATA SHEET

Product Number:

043064

DIONEX Corporation
1228 Titan Way
P.O. Box 3603
Sunnyvale, California
94088-3603

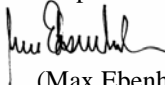

Product Description:

**OligoStandard™
Sialylated Fetuin N-Linked Alditols**

Emergency Phone:
1-800-424-9300 (CHEMTREC)

Information Phone: (408) 737-0700

Date Prepared: 20 April 2004

Prepared By: 
(Max Ebenhahn)

The following information is believed to be accurate and is currently the best information available to us. However, we make no warranties, express or implied, with respect to the information supplied and we assume no liability resulting from its use.

SAFETY DATA: The standard contains 27.5 ± 2.5 nmol of purified sialylated *N*-linked fetuin alditols that have been isolated and purified from a natural glycoprotein. This glycoprotein has an animal (bovine) origin. Sialylated *N*-linked fetuin alditols are known to modify the biochemical, biophysical, and biological properties of the proteins to which they are attached, however, the definitive pharmacological, toxicological, carcinogenic, teratogenic and other biological properties of the substances are unknown.

Although the sialylated *N*-linked fetuin preparation has not been assessed for microbiological contamination, the substances are nevertheless isolated by chemical conditions and exacting chromatographic separations that will sanitize the isolated materials.

NOTICE

The above standard is strictly for *in vitro* laboratory research use only! They may not be administered in any form or combination to humans, animals or plant species, neither may they be used for any diagnostic purposes.
